

SERIES 2000

Flat Belt Scraper

- **Patented** "finger system" allows scraper to be fitted in any position from the snub drum backwards
- **Durable** carbide tips as standard
- Does not require slack belt to operate
- Works successfully on belts with both **vulcanised** and **clip joints**
- Old and worn belts are not damaged
- Also works on convex drums
- Standard carbide tip 5 finger blades, very flexible and cleans whole width of belt
- **Easy fitting, low cost** maintenance and spares
